AVEVA PI System Security for Critical Operations

This whitepaper explores how digital transformation benefits organizations through optimized operations and improved asset performance. It delves into IoT, AI, big data, and digital twins' role in enhancing maintenance strategies, workplace safety, and sustainability goals. It emphasizes safe data collection, cybersecurity, and the AVEVA PI System's role in democratizing data, insights, and ensuring security and compliance.

Did You Know...

- The AVEVA PI System is deployed by 65% of Fortune 500 industrial companies
- 91% of companies say that improving their digital dexterity improves their work effectiveness *(Gartner)*
- $100 billion in value is unlocked through digital collaboration - thanks in part to productivity boosts of 20%-30% *(McKinsey)*
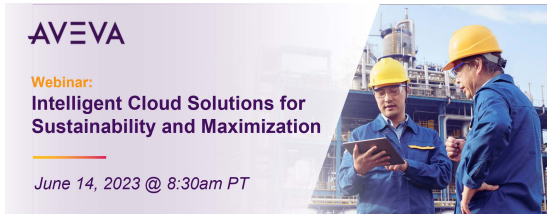

Tech Notes

Automatically Launching an InTouch Application on Startup using a Batch File

Each time an operator needs to view their Intouch application at runtime, they must manually run the InTouch WindowViewer application. This technote will discuss how to use a batch file to automatically run the application each time Windows is restarted. There is an optional step in which you may delay opening your InTouch application, to allow time for other applications to run first.

Webinars & Events

Wednesday, June 14th @ 8:30am PT
Intelligent Cloud Solutions for Sustainability and Profit Maximization

This webinar demonstrates cost savings and increased profits in a specialty chemical refinery through an intelligent edge-to-cloud data infrastructure. It highlights the advantages and best practices for capturing and analyzing data from alternate locations, and real-world examples of how edge data drives digital transformation and enhances decision-making for higher profitability.

Tuesday, June 20th @ 8:30am PT
Building a Layers of Analytics Strategy for Operational Data

This webinar will discuss the significance of a layered analytics strategy and how it can be used to leverage operational data effectively. It will cover topics such as data quality, condition-based and predictive maintenance, and process diagnostics. The webinar will also explore the role of subject-matter experts and provide insights into best practices for evolving layers of analytics.

Upcoming Training Courses

AVEVA Operations Management Interface for System Platform
Date: June 20th - 23rd

AVEVA InTouch
Date: July 11th -14th

AVEVA Application Server
Date: July 25th - 28th

AVEVA InTouch for System Platform
Date: August 8th - 11th

Did you know we offer training subscriptions for our customers in the Northwest US and Western Canada? Whether you want to take multiple courses yourself or have colleagues interested in joining, we have a subscription package for everyone.

Standard

Four training seats for a one-year period. You can take all four classes yourself or share seats with your coworkers.

Premium

20 training seats within a one-year period, perfect for teams looking to attend multiple classes together or separately.

Unlimited

Take as many courses as you want within a one-year period. Ideal for large teams or those looking to explore the full range of AVEVA Software.
